The world's first electronic cutting machine with a built-in scanner now has Blade Sensor Technology. Cut card, self adhesive vinyl, felt, leather and foam with the new Auto Blade that automatically detects the thickness of your machine. No PC required. Edit cut data on the 5 inch LCD touch screen display. Reads SVG cutting files and PES embroidery files. Convert embroidery designs to cut data directly on the machine. Cuts up to 3mm. Includes accessories for drawing, cutting fabrics and making fabric appliques. Ready to cut, 1303 built-in designs, 17 built-in fonts. USB port for storing and importing files. Wireless network ready. The ScanNCut has proved a successful offering to our clients from Aged Care Facilities and Schools to Fashion Designers - as well as the hobby enthusiasts. It is incredible to see this amazing product take your scanned images and turn them in to unique cutting designs. See it. Scan it. Cut it. Create it!
